This volume seeks to foreground a borderless history and geography of South, Southeast, and East Asian littoral zones that would be maritime-focused, and thereby explore the ancient connections and dynamics of interaction that favoured the encounters among the cultures found throughout the region stretching from the Indian Ocean littorals to the Western Pacific, from the early historical period to the present. Transcending the artificial boundaries of macro-regions and nation-states, and trying to bridge the arbitrary divide between (inherently cosmopolitan) high cultures (e. g.

Benjamin Armstrong sets out to take irregular naval warfare out of the shadow of the blue-water battles that dominate naval history. This book, the first historical study of its kind, makes a compelling case for raiding and irregular naval warfare as key elements in the story of American sea power.

Benjamin Armstrong is Assistant Professor of War Studies and Naval History at the U.S. Naval Academy. He is the editor of 21st Century Mahan and 21st Century Sims and the author of numerous articles on naval history, national security, and strategy.

For millennia, Malta has always been considered a site of strategic importance. From the arrival of the Phoenicians through rule under Carthage, Rome, Sicilian Arabs, Normans, and Genovese, to the Order of St. John ('Knights of Malta'), the advent of the Napoleonic Wars, and even World Wars I and II, the Maltese islands have served as re-provisioning stations, military bases, and refuges for pirates and privateers.

The Confederate Steam Ship Shenandoah is renowned as the last vessel to surrender after the Civil War, and the young officers on board--who didn't learn of the war's end for three months--consequently suffered extraordinary physical and emotional stress. This first-hand account of the crew's hazardous last year, told through shipboard diaries and postwar journals, reveals the heavy personal toll they paid during the cruiser's transition from commissioned commerce raider to hunted fugitive. Many of the Shenandoah's officers had resigned commissions in the United States Navy to fight for the South.

Dampier's observations and descriptions are as valid today as they were in the 17th century and this book is to be commended to anyone who is interested in the great early voyages of exploration. THE REVIEW

William Dampier (baptised 5 September 1651; died March 1715) was an English explorer, pirate, privateer, navigator, and naturalist who became the first Englishman to explore parts of what is today Australia, and the first person to circumnavigate the world three times. GERALD NORRIS writes on maritime and musical subjects.

Britain's foremost scholar of the international shipping industry, based at the Centre for Port and Maritime History, University of Liverpool, here examines the growth and development of Japan's modern shipping and shipbuilding industries across a wide range of topics, through the pre-war, Pacific War and post-war periods, to the transfer of shipping technology, the role of bulk carriers and world trade and the organization and structure of the Japanese merchant navy. Prompted originally by his research into the decline of the British industries in a global context, his focus inevitably turned to Japan which in the post-war years had replaced Britain as the world's largest ship operators and ship owners and remains so today.

Edwin Dunbaugh's newest book, combining 49 nostalgic period photographs of steamships and in-depth historical research, will appeal to enthusiasts of maritime history and to students of New England business and maritime developments. Overnight steamboats between New York and ports in southern New England reached its zenith in the early years of the 20th century. This book presents the definitive account of the steamboats of that era, 1907 to 1942, when parades of beautiful steamers departed from their piers in Manhattan in the early evening and proceeded overnight through Long Island Sound to New England ports as far away as Boston and Portland.

Edwin L. Dunbaugh recently retired as professor of history at Hofstra University.

Navy in Post-Cold War World: The Uses and Value of Strategic Sea Power

Gray, Colin S.

Penn State University Press .

9780271025865

216 pages

paperback

\$30.95

Pub Date:

6 x 9. illustrations

The Navy in the Post-Cold War World is the first book to invite the reader to think strategically—that is, in means-ends terms—about the navy in the new post-Soviet era. It provides a unique synthesis of strategic theory, defense analysis, and history. Colin Gray first explains how sea power 'works'; explores the strategic relationship among sea, land, and air power, with particular attention to the course of a conflict viewed as a whole; and ventures boldly into the region of the meaning of space strategy for maritime power and the relevance of that power in the still emerging post-Cold War security environment.

This book traces how the maritime Southeast Asia tribal societies that prospered under the Age of Commerce lost their autonomy in the course of modernization and became minorities. So far, the maritime world has not been fully described due to the limitation of written documents, the general tendency to follow national historical writing, and the mainland-centered historical view. Focusing on Southeast Asia, the author attempts to present a new historical image by utilizing genealogy and oral tradition.

Shinzo Hayase was Assistant Profesoor. and Associate Professor, Kagoshima Univ. (1987-1993) Associate Professor and Professor, Osaka City University, Graduate School of Literature and Human Sciences (1993-2013) Professor, Waseda University, G. S. of Asia-Pacific Studies (2013- present).

Bluejackets in the Blubber Room explores key events in US maritime history from the 1820s to the end of the Civil War through the biography of the sailing ship William Badger. Taking a biographical approach to his subject, Peter Kurtz describes three phases of the life of the William Badger, a sailing ship with a long and exemplary life on the sea: first as a merchant ship carrying raw materials and goods between New England, the US South, and Europe; second as a whaling ship; and finally as a supply ship providing coal and stores for the North Atlantic Blockading Squadron in Beaufort, North Carolina, during the Civil War.

Peter Kurtz received a bachelor's degree in journalism from Ohio University and has written magazine articles pertaining to both music and history.

The virtues of the citizen-soldier are prominent in the history of the American Revolution, but less attention has been given to the citizen-sailor. However, there were state navies during the war, the seaward equivalent of the state militias, and the state of South Carolina put to sea the most important of these. Under the leadership of Commodore Alexander Gillon the South Carolina navy secured the services of the largest warship under any American's command, the frigate South Carolina.

James A. Lewis teaches in the history department at Western Carolina University. His other publications included Guide to Cherokee Documents in Foreign Archives and The Final Campaign of the American Revolution: Rise and Fall of the Spanish Bahamas.

Pub Date: March 2014

Edited by Bonny V. Fetterman.

The story of an American 'Dreyfus.' 'Commodore Levy is a remarkable work of nautical fiction, a rousing story based on a real-life character: a great nineteenth century Jewish American naval officer, intelligent, skillful, and full of courage, but often harassed by his bigoted superiors because of his religion, who rises from a non-commissioned sailing master to the highest rank in the pre-Civil War U. S.

Irving Litvag was a former news writer for the CBS Radio Network and public relations executive. A lifelong resident of St. Louis, he completed this novel shortly before his death in 2005. Bonny V. Fetterman has been a freelance editor and publishing consultant for over twelve years.

The mighty battle action fought between an American destroyer and a German U-boat north of the Azores Islands in late October, 1943, has been called the most spectacular surface battle since the days of John Paul Jones. Robert A. Maher was a young sailor who served on the Navy destroyer USS Borie DD215 in that battle, and his personal account of the war culminates in this decisive battle.

Robert A. Maher is retired from the technical staff at Bell Telephone Laboratories. Together with James E. Wise, Jr., he received the 1993 U.S. Naval Institute's "Distinguished Author of the Year" award for the two-part article "Stand By for a Ram!" published in Naval History. Captain James E. Wise, Jr., USN (Ret.) has served as a naval aviator, intelligence officer aboard the aircraft carrier USS America, and commanding officer of various naval intelligence units. His publications include Shooting the War: Memoirs of a World War II U-Boat Officer; Sole Survivors of the Sea; and Stars in Blue.

Lord Keith, a Scottish admiral who rose to prominence serving His Majesty from 1761 to 1815, ended his career by overseeing Napoleon's surrender in 1815. Born George Keith Elphinstone, Keith at one time or another held nearly every important command in the British navy, and his story illustrates the navy's history during the Age of Fighting Sail. McCranie's book is the first modern biography of Keith, who learned the art of commanding single ships and small squadrons during the American Revolution.

Kevin McCranie, assistant professor of history at Brewton-Parker College in Mount Vernon, Georgia, is also adjunct professor of strategy and policy at the United States Naval War College in Jacksonville, Florida.

Tobacco Coast is the history of how the Chesapeake Bay shaped the society and economy of an entire region. Its hundreds of miles of navigable tributaries made adoption of the tobacco staples possible and eliminated the necessity of cities and towns; its physical dominance created an "essential unity" of lands sharing its shores, despite the political decisions that created the separate colonies of Maryland and Virginia.

Arthur Pierce Middleton is the retired director of Colonial Williamsburg. He recieved his Ph.D. degree from Harvard University under Samuel Eliot Morison.

Somali piracy has been linked repeatedly to the spectre of Barbary. Piracy off the Horn of Africa has certainly raged with the intensity of a perfect storm with the spread of conflict and disorder. The purpose of this book is to examine whether or not state failure is a useful and accurate explanation for Somali piracy and if violent Islamism could exploit what the pirates have achieved for their own ends.

Dr Martin N. Murphy is one of the world's leading experts on piracy and irregular warfare at sea. He lives and works in Washington, DC where he advises the US Navy. He is also a Visiting Fellow at the Corbett Centre for Maritime Policy Studies at King's College, University of London.

It has been alleged that pirates and maritime terrorists present a largely common threat to international maritime security. This book drives to the heart of this proposal by reviewing in detail each phenomenon before asking how and under what circumstances pirates and maritime terrorists might combine forces. Murphy concludes that while piracy may be a marginal problem in itself, the connections between organised piracy, wider criminal networks and corruption on land on mean that it may undermine states and destabilise the regions in which it occurs.

New Perspectives on Maritime History and Nautical Archaeology

One of the Coast Guard's great heroes and the secret he kept hidden. In the late 1880s, many lives in northern and western maritime Alaska rested in the capable hands of Michael A. Healy (1839-1904), through his service to the U.S. Revenue Cutter Service. Healy arrested lawbreakers, put down mutinies aboard merchant ships, fought the smuggling of illegal liquor and firearms, rescued shipwrecked sailors from a harsh and unforgiving environment, brought medical aid to isolated villages, prevented the wholesale slaughter of marine wildlife, and explored unknown waters and lands. Sixty-seven years later, in 1971, the U.S. Coast Guard learned that Healy was born a slave in Georgia who ran away to sea at age fifteen and spent the rest of his life passing for white.

Samuel Walters, Lieutenant R. N. offers a personal perspective on the British navy at the height of its power, as it chronicles the remarkable tale of a young naval officer who fought around the world in the service of Admiral Lord Nelson. Edited by acclaimed maritime writer C. Northcote Parkinson, the book offers a brutal and complex portrait of life at sea during one of the pivotal periods in British naval history.

Cyril Northcote Parkinson (1909-1993) was a British historian and author of some sixty books. Besides his numerous works on British politics and economics, he also wrote historical fiction, often based on the Napoleonic period, and sea stories. He is most famous for his ridicule of bureaucratic institutions, notably his 'Parkinson's Law and Other Studies', a collection of short essays explaining the inevitability of bureaucratic expansion.

In this moving and thought-provoking reflection of underwater cultural heritage management, Natali Pearson reveals valuable new information about the Belitung salvage, obtained firsthand from the salvagers, and the intricacies in the many conflicts and relationships that developed. In tracing the Belitung's lives and afterlives, this book shifts our thinking about shipwrecks beyond popular tropes of romance, pirates, and treasure, and toward an understanding of how the relationships between sites, objects, and people shape the stories we tell of the past in the present.

Natali Pearson teaches in the Sydney Southeast Asia Centre at the University of Sydney, Australia.

Through the years, many historians have placed the blame for the Royal Navy's American Revolution defeat at Yorktown squarely on the shoulders of Admiral Samuel Hood. In this detailed history of Hood's career, Colin Pengelly engages with the details of the Yorktown battle to discover how Hood escaped criticism and blame during his lifetime and rose to the post of Admiral of the Mediterranean Fleet.

Colin Pengelly is a retired civil servant and amateur historian. He is the author of The First Bellerophon.

Civil War Ironclads supplies the first comprehensive study of one of the most ambitious programs in the history of naval shipbuilding. In constructing its new fleet of ironclads, William H. Roberts explains, the U. S. Navy faced the enormous engineering challenges of a largely experimental technology. In addition, it had to manage a ship acquisition program of unprecedented size and complexity.

After retiring from the navy in 1994 as a surface warfare officer, William H. Roberts earned his Ph.D. in history at the Ohio State University in Columbus. He is the author of USS New Ironsides in the Civil War and "Now for the Contest": Coastal and Oceanic Naval Operations in the Civil War.

A comprehensive history of Australian Aboriginal whaling and sealing. For most Australian Aboriginal people, the impact of colonialism was blunt--dispossession, dislocation, disease, murder, and missionization. Yet there is another story of Australian history that has remained untold, a story of enterprise and entrepreneurship, of Aboriginal people seizing the opportunity to profit from life at sea as whalers and sealers.

Schroeder's interpretive biography restores Rodgers to his rightful place in history as the preeminent and most influential naval officer during America's Age of Sail. Between 1798 and 1815, Rodgers fought with distinction in the Naval War with France, the Barbary War, and the War of 1812. He shaped the postwar development of the navy as president of the Board of Navy Commissioners from 1815 to 1835, and he led a major diplomatic mission to the Mediterranean in the mid 1820s.

Nor'easters, blizzards, and hurricanes. Spanish galleons, German U-boats, and presidential yachts. Pirates and privateers. The ephemeral and deadly nature of islands, dunes, inlets, and shoals. The history of the Delmarva Peninsula's Atlantic coast is rich with tales of fantasy and adventure, heroism and tragedy, greed and charity. Claiming more than 2,300 vessels since 1632, it rivals North Carolina's Outer Banks for the infamous title The Graveyard of the Atlantic. Maritime historian Donald G. Shomette brings these stories to life. Featuring the accounts of twenty-five ill-starred vessels—some notorious and some forgotten until now—this anthology provides a fascinating history of a local maritime culture and charts how the catastrophic events along this shore significantly affected U. S. merchant shipping as a whole.

Donald G. Shomette is a marine archeologist and cultural resource manager in Dunkirk, Maryland.

Roger C. Smith follows the mysterious tracks of the sea turtles and the mariners who hunted them, from the shores of the Caymans to the coastal lagoons of Cuba and finally to the Miskito Cays of Nicaragua. He also pursues the colonial exploits of privateers and pirates, examines the development of island catboats and schooners, and takes the reader underwater to the sites of unlucky ships that wrecked on poorly charted reefs.

Mutiny and Aftermath: James Morrison's Account of the Mutiny on the Bounty and the Island of Tahiti

Despite the manifestly important character of the topic, one of the key primary sources for the voyage, the mutiny, and the aftermath is unavailable in any modern scholarly edition. James Morrison was boatswain's mate on the Bounty, he was the author of rich, engaging, and entertaining text, the first part a narrative of the expedition, the mutiny, and the residence of a group of the mutineers on Tahiti, the second a rich and important manners and customs style ethnography of Tahitian life. Usually known as the journal of James Morrison, but in fact a retrospective account, probably based on some kind of diary, the text is a fascinating read that would appeal to any fan of the Bounty story, and is a key historical and anthropological source.

Why do Ryukyu's official histories locate the origins of its early dynastic founders in Iheya and Izena, small islands located northwest of Okinawa? Why did the Ming court extend favorable trade terms to Ryukyuan rulers? What was the nature of Okinawa's enigmatic principalities, Sannan, Ch?zan, and Hokuzan? When and how did the Ryukyu islands become united under a single ruler? Was this Ryukyuan state an empire, why did it go to war with the powerful Japanese domain of Satsuma in 1609, and what actually happened during that war? Answers to these and other key questions concerning early Ryukyuan history can be found in this bold reappraisal by a leading authority on the subject.

Conventional portrayals of early Ryukyu are based on official histories written between 1650 and 1750. Taking an interdisciplinary approach, Gregory Smits makes extensive use of scholarship in archaeology and anthropology and leverages unconventional sources such as the Omoro s?shi (a collection of ancient songs) to present a fundamental rethinking of early Ryukyu.

Gregory Smits is professor of history and Asian studies at Pennsylvania State University.

Roderick Random (1748), Smollett's first novel, is full of the dazzling vitality characteristics of all his work, as well as of his own life. Roderick is the boisterous and unprincipled hero who answers life's many misfortunes with a sledgehammer. Left penniless, he leaves his native Scotland for London and on the way meets Strap, and old schoolfellow. Together they undergo many adventures at the hands of scoundrels and rogues.

Tobias George Smollett (19 March 1721 – 17 September 1771) was a Scottish poet and satirical novelist, best known for his picaresque novels *The Adventures of Roderick Random* (1748) and *The Adventures of Peregrine Pickle* (1751) and his epistolary novel *The Expedition of Humphry Clinker* (1771).

The maritime tradition is particularly important to the history of proselytizing and migration in the Church of Jesus Christ of Latter-day Saints, also known as the Mormons. Small groups of energetic, dedicated, and resourceful missionaries traveled to every continent, and as a result of their activities, some 85,000 converts emigrated and helped colonize the American West. Based on extensive research, *Saints on the Seas* chronicles the voyages of approximately 300 American, British, German, Dutch, Danish, Norwegian, and French ships involved in the emigration.

Exploiting the Sea offers new perspectives on Britain's vital but changing relationship with the sea since the late nineteenth century. It assesses the significance to the British economy of sea-reliant industries such as shipping, shipbuilding, fishing, coastal trading and seaside tourism. It also seeks to explain why the clear pre-eminence that Britain established in the maritime world during the Victorian era has not been sustained in the twentieth century.

Dr Starkey joined the History Department at Hull when he became the holder of the first permanent lectureship to be dedicated to maritime historical studies in the UK university sector - the Wilson Family Lectureship in Maritime History. Dr Starkey is Director of the Maritime Historical Studies Centre at the University of Hull. Alan G. This book gives an exciting overview of the US Navy, from when it first formed to its missions and members today, as well as their tasks, equipment, and training. Short paragraphs of easy-to-read text are paired with plenty of photos to make reading engaging and accessible. The book also includes a table of contents, fun facts, sidebars, comprehension questions, a glossary, an index, and a list of resources for further reading. Apex books have low reading levels (grades 2-3) but are designed for older students, with interest levels of grades 3-7.

Ashley Storm lives in Kentucky with her husband, three mischievous cats, and four bossy backyard chickens who peck on the door to demand treats. In the winter, you'll find her hibernating at home beneath a pile of blankets and cats. In the summer, she's probably exploring Kentucky's numerous rivers and lakes. Whether she's in a kayak or jumping off the front of a pontoon, she's happiest in the water. She and her husband also enjoy camping and have a tiny teardrop camper that they haul from state to state. Ashley writes fiction and nonfiction for several educational publishers, including Heinemann, Black Rabbit Books, and Saddleback.

The Indians of coastal Long Island were closely attuned to their maritime environment. They hunted sea mammals, fished in coastal waters, and harvested shellfish. To celebrate the deep-water spirits, they sacrificed the tail and fins of the most powerful and awesome denizen of their maritime world—the whale. These Native Americans were whalemen, integral to the origin and development of the first American whaling enterprise in the years 1650 to 1750. America's Early Whalemen examines this early chapter of an iconic American historical experience.

Van Tilburg's study the maritime heritage of Chinese junks and their transpacific voyages examines ten junks, how they were made, why and how they traveled, and how the West received them. Combining historical narrative with ethnology, anthropology, maritime archaeology, and nautical technology, he draws on a wide range of newspaper sources, secondary texts, nautical treatise, archaeological site work, rare historical photos and sketches, and the personal testimony of the sailors themselves to examine these vessels not only as transport vehicles but as complex cultural artifacts that "speak" of a distant seafaring past and intimate cultural ties to the sea.

The accepted narrative of the interwar U.S. Navy is one of transformation from a battle-centric force into a force that could fight on the "three planes" of war: in the skies, on the water, and under the waves. The political and cultural tumult that accompanied this transformation is another story. Ryan D. Wadle's *Selling Sea Power* explores this little-known but critically important aspect of naval history.

Pub Date: 8/15/2014

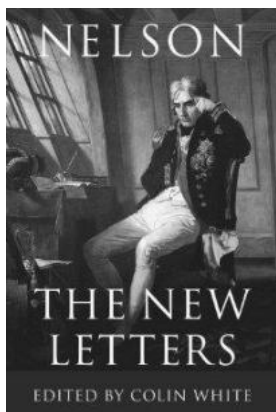

Edited by William E. Gienapp and Erica L. Gienapp. Foreword by James M. McPherson. 6.125 x 9.25 INCHES 14 BLACK & WHITE PHOTOGRAPHS. A volume in The Knox College Lincoln Studies Center series, edited by Douglas L. Wilson and Rodney O. Davis.

The definitive edition of an essential Civil War document.

Gideon Welles (July 1, 1802 – February 11, 1878), nicknamed "Father Neptune", was the United States Secretary of the Navy from 1861 to 1869, a cabinet post he was awarded after supporting Abraham Lincoln in the 1860 election. Although opposed to the Union blockade of Southern ports, he duly carried out his part of the Anaconda Plan, largely sealing off the Confederate coastline and preventing the exchange of cotton for war supplies. This is viewed as a major cause of Union victory in the Civil War, and his achievement in expanding the Navy almost tenfold was widely praised. Welles was also instrumental in the Navy's creation of the Medal of Honor. WILLIAM E. GIENAPP was a professor of history at Harvard University. He authored Abraham Lincoln and Civil War America and The Origins of the Republican Party, 1852–1856, among other publications. ERICA L. GIENAPP earned a degree in history from the University of California at Berkeley.

After World War I, the U.S. Navy's brief alliance with the British Royal Navy gave way to disagreements over disarmament, fleet size, interpretations of freedom of the seas, and general economic competition. This go-it-alone approach lasted until the next world war, when the U.S. Navy found itself fighting alongside the British, Canadian, Australian, and other Allied navies until the surrender of Germany and Japan. In *The U.S. Navy and Its Cold War Alliances, 1945–1953*, Corbin Williamson explores the transformation this cooperation brought about in the U.S. Navy's engagement with other naval forces during the Cold War.

The wartime memoir of the legendary submarine skipper and naval tactician.

Eugene B. Fluckey, Rear Admiral, USN (Ret.), was a 1935 graduate of the United States Naval Academy. For his valor under fire, Lt. Cdr. Fluckey was awarded four Navy Crosses and the Congressional Medal of Honor, unequalled by any living American. The crew of the USS Barb received the Presidential Unit Citation and Navy Unit Commendation. In 1989 the U.S. Navy honored Fluckey by naming the nuclear submarine Combat Systems Training Center, the largest and highest building in New London Connecticut, Fluckey Hall, the only building there named for a living person. His last active duty was as NATO Commander in Chief of the Iberian Atlantic Area in Lisbon, Portugal, from which he retired in 1972. In June 1991 he did research for Thunder Below in remote villages on the coast of China. Of his many citations, Fluckey said he was most proud of the one medal no member of his crew was ever awarded: the Purple Heart, given to those wounded under fire.

Most World War II submarine stories are glorifications of war written by submarine captains about their own boats. But the USS Pampanito was not a typical submarine. The sub and its crew caused plenty of destruction, but they found the pinnacle of their honor and fame in a dramatic sea rescue. Gregory F.
