item # 322

The wild mammals of the Great Basin are often elusive and difficult to locate. They range from deserts to mountain tops. Their tracks, scats, and signs may be the best clue for the nature-wise detective whether a casual observer, amateur naturalist, or outdoor adventure enthusiast of any age. Now, a practical, convenient-sized guide for use in track-scene investigation.

Dr. James Halfpenny, founder of A Naturalist's World, is a former research associate at the Institute of Arctic and Alpine Research, University of Colorado at Boulder. He was an instructor at the National Outdoor Leadership School and served as director of the Mountain Research Station. He has taught tracking since 1967.

Conifers of the Pacific Slope is a contemporary field guide built to assist plant lovers in identifying one of the most intriguing and ancient groups of plants in the world. Conifers survive within the West's most spectacular environments from the coastal temperate rainforests to the highest mountain summits.

Growing up in the eastern deciduous forests of Virginia Michael Edward Kauffmann would stare out the window in the winter, hooting for barred owls and wonder...why are some of those trees still green? He nurtured his evergreen conifer fascination in the Appalachian Mountains at Virginia Tech and, upon graduation, landed a job teaching outdoor education in California. Sans family, alone in the West, he began to hang out with giant sequoias and foxtail pines on weekends. The high country conifers of southern California entertained him for many years until the temperate rainforest eventually called him north to Humboldt County. He now lives in Kneeland, California, with his beautiful wife, Allison, his son, Syllas, and dog, Skylar. Besides writing, he works as a devoted teacher both at the elementary and college level, is the founder and president of the Bigfoot Trail Alliance, and editor for the Bulletin and Fremontia journal of the California Native Plant Society.

Pilgrimage through a Burning World: Spiritual Practice and Nonviolent Protest at the Nevada Test Site

Butigan, Ken

SUNY Press .

9780791457788

240 pages

paperback

\$31.95

Pub Date: 8/1/2003

For two decades the Nevada Desert Experience has organized nonviolent action at the Nevada Test Site as part of the global movement to end nuclear testing. Pilgrimage through a Burning World illuminates how the Franciscan-based group has crafted a contemporary desert spirituality that integrates religious ritual and political action to grapple with the challenges of an institutionalized and internalized nuclear world. Ken Butigan shows how the annual pilgrimage to the test site has contributed to the personal transformation of people on both sides of the fence at the test site and to the worldwide emergence of the Comprehensive Test Ban Treaty.
